

KREG ROUTER TABLE INSERT PLATE CUSTOM DRILLING PROGRAM

Program Overview:

Kreg's Precision Router Table System and Precision Benchtop Router Table come with a 3/8" thick phenolic insert plate which is 9-1/4" x 11-3/4" in size. This insert plate has been designed to easily mount to any router, utilizing your router's base plate and a simple (included) template for drilling your own holes. This "swiss-cheese" free design eliminates hang-ups on the plate surface and reduces the chances of routing inconsistencies.

To help simplify the process of drilling holes into your insert plate, Kreg has prepared a demonstration video to help walk you through the steps of this process. You can access this video for free at www.kregtool.com or contact us at 800-447-8638 and we'll email you a copy.

However, if you would like Kreg to custom drill the holes in your insert plate for you, simply follow the instructions below and we'll gladly process your insert plate to fit your router for a small fee.

Program Instructions:

- 1.) Completely fill out the Custom Insert Plate Drilling form that follows. If you've misplaced this form, you can download another copy from our website at www.kregtool.com or call us and we'll send one to you.
- 2.) Send us the **base plate and mounting hardware off of your router** to ensure that we have the correct hole spacings that will be required. If there are multiple holes in your base plate, make sure you clearly mark the holes you would like us to drill for attachment to the insert plate.
- 3.) Include payment. Payment may be made in the following forms:
 - Do NOT send cash
 - Check or money order made payable to Kreg Tool Company
 - Credit Card – Please provide the following information:
 - Credit Card number
 - Cardholder's name as it appears on the card
 - Complete billing address as it appears on your credit card statement
 - Expiration date
 - 3-digit security code from back of card
- 4.) Send your completed form, payment information, your router's base plate and mounting hardware and the Kreg Router Table Insert Plate, packaged securely to the address below. We recommend wrapping the plate in foam or bubble wrap to avoid damage.

Kreg Tool Company
Attn: Router Insert Plate Custom Drilling Program
201 Campus Drive
Huxley, IA 50124

Cost:

- Cost for custom drilled holes is **\$30** US funds (for continental U.S. customers).
- This cost includes Kreg's shipping and handling charges back to you (within continental U.S. only).
- If you are located outside of the continental U.S., additional shipping and handling charges will apply.

Lead Time:

Please allow 10 business days at Kreg for processing your plate. These 10 business days do not include your shipping time to Kreg or Kreg's shipping time back to you.

KREG ROUTER TABLE INSERT PLATE CUSTOM DRILLING PROGRAM
